Profile

I like many aspects of computer science, including **programming**, but also **hardware** and technology in general. I'm very fond of web development and I learnt almost everything by myself thanks to the "trial and error technique". I don't mind being involved in different projects and I really like to teach others my knowledge and my experiences.

Education

SCUOLA MEDIA Istituto Comprensivo Italo Calvino (Galliate)
2010 - 2013 Achieved a middle school graduation.

SCUOLA SUPERIORE Istituto Tecnico Giacomo Fauser (Novara)
2013 - 2018 Computer science and telecommunications: study and planning of computer networks, development in C, C ++, C #, PHP, JavaScript, HTML and CSS, project management and business organization.
Achieved a secondary school diploma in IT

Training

FCE CAMBRIDGE ITT Fauser
2017 Knowledge of the English language.
Achieved FIRST certificate (Passed at grade B).

CISCO IT ESSENTIALS ITT Fauser
2017 Basic principles of computer science, building and updating the hardware and software of a computer, maintenance and troubleshooting of computer systems, implementation of basic security rules.

ECDL ITT Fauser
2013 - 2014 Basic knowledge of computer science, operating systems (Windows), word processing software and spreadsheets (Microsoft Word, Excel 2007), web editing (Adobe DreamWeaver).

Work experience

DEVELOPER MEMC Electronic Materials S.P.A.
2017 Development of a script with the "R Script" language for the creation of daily statistics and production reports. Management of a Digital Signage system.

TEACHER Scuola Media Bellini
2017 Teaching the use of the Office suite (Excel, PowerPoint and Word) to a group of first and second year students of the "scuola media".

Languages

Mother tongue: Italian.

Other language: English (level B2 certified, certificate [attached here](#)).

Skills

HTML e CSS

PHP e MySQL

JavaScript

C e C++

C#

Projects

AzzLabs

AzzLabs is a project that I have been working on since 2013. It was born with the idea of being a container, or showcase, of projects related to, and beyond, the web. AzzLabs is currently hosted on multiple virtual servers in my management.

Obtained skills: active management of a website and Linux virtual servers (Ubuntu and CentOS).

Oratorio Beato Quagliotti (Galliate)

I participate as a volunteer at the local oratory, I'm developing and maintaining a web application for the management and data collection of the members and the issuing of receipts. I manage, together with others, the oratory theater and I deal with setting up the audio and video for the events that are regularly held in the hall. Occasionally I propose myself as a teacher for IT courses for young people in the oratory.

Obtained skills: web application development, technical management for small shows, teaching.

Ideainsieme

I occasionally collaborate with a member of Ideainsieme (<http://ideainsieme.it/>, they help elders thanks to volunteers) as a consultant for the creation of an efficient guest network for the hospice of Galliate and I'm working on of the restyling of their website.

Obtained skills: website development, optimization of a public network.
